

## Sprint 1 Meeting #2 Notes

### What was discussed / done:

- Sprint 1 Plan was significantly revised by group to reflect TA suggestions
  - User stories were boiled down into two user stories
  - Task hour estimates were updated to be more realistic and allow for problems that might come up in implementation
  - Decided to pull representatives from external site with python script as a task
- UI and layout of website was collectively discussed, deciding on navbar for website
- Everyone had finished the Django tutorial on the Django website, fulfilling the main goal that needed to be done by this meeting
- Each group member decided on tasks that they were comfortable with, based off of prior experience
- Decided to have more than one member working on more time-consuming tasks, with pair programming being a possibility
- Scrum board was updated to reflect the new sprint plan
- Everyone came out of the meeting with a concrete task to work towards for the rest of this sprint
