

Your Voice Heard Sprint 3 Report

Team: Zoomers

Date: July 21st, 2020

Revision 1

- **Actions to stop doing:**
 - Don't base design around features.
- **Actions to start doing:**
 - Create a design for a feature first. Then implement the feature. Having a layout is important.
 - Have a *better* coding standard within the group. (We had a general template we followed, but it could always be improved!)
- **Actions to keep doing:**
 - Continue making our own development branches and push to that instead of the master branch
 - Continue talking to teammates when we encounter problems and being proactive
- **Work completed:**
 - Scroll down menus for reps on message generation
 - Mailto feature for BLM page with scroll down menu
 - Layout and visual appeal
 - Website organization
 - Page for the top voted issue
- **Work not completed:**
 - Modifying the results page to show a link to a top-voted issue from a previous voting period
 - Email information - Climate Change
 - Organizations are generally already helping the cause, a "call to action" message is best sent to government officials
 - Email information - Yemen
 - Decided it was better to take users to IRC (International Rescue Committee) so that they could donate, not many people could email within the US. Did not scrap the email generator for local representatives in the prototype.
 - Email information - ICE
 - The issue this was based on is no longer an issue so we scrapped it.

- **Work completion rate:**
